SAN DIEGO COMMUNITY POWER

As your local clean energy provider, San Diego Community Power is here to serve you with reliable electricity and more choice in your energy options.

Each year, San Diego Community Power provides customers with a Power Content Label showing the energy sources used to serve them during the previous year and the associated greenhouse gas emissions.

Think of it like a nutrition label for your electricity, showing the mix of energy sources used to serve customers in 2025, the greenhouse gas emissions of each source and how our service options compare.

SAN DIEGO COMMUNITY POWER

What is this chart?

Every year, California state law requires all electricity providers, including Community Power, to share this information in a standardized Power Content Label. Most Community Power customers are automatically enrolled in our PowerOn service plan, while customers in the City of Encinitas are enrolled in Power100. Customers may change their service plan at any time.

Visit **SDCommunityPower.org/Service-Options** to learn more.

The generation data represents energy procured during 2025 and is provided in the "Annual Report to the California Energy Commission: Power Source Disclosure Program." This information is required by the California Energy Commission to be sent to Community Power's active customers. Percentages may not total 100% due to rounding.

San Diego Community Power
2025 Power Content Label

Emissions, Power Sources, Unbundled RECs	Power100 G+ (Retail Sales)	Power100 (Retail Sales)	PowerOn (Retail Sales)	PowerBase (Retail Sales)	San Diego Community Power Total (Retail Sales, Other End Uses, & Losses)	CA Utility Average (Retail Sales, Other End Uses, & Losses)
Greenhouse Gas Emissions Intensity (lbs of CO_2e emitted per megawatt hour)	0	0	473	713	468	384
Renewables and Zero-Carbon Resources	100%	100%	63%	51%	63%	67%
Fossil Fuels	0%	0%	37%	49%	37%	33%
Biomass & Biogas	0%	0%	7%	35%	7%	2%
Geothermal	0%	0%	0%	0%	0%	5%
Eligible Hydroelectric	0%	0%	0%	0%	0%	1%
Solar	50%	50%	32%	0%	32%	25%
Wind	50%	50%	12%	12%	14%	14%
RPS Eligible Renewables - Subtotal	100%	100%	52%	47%	53%	46%
Large Hydroelectric	0%	0%	0%	0%	0%	10%
Nuclear	0%	0%	8%	0%	7%	10%
Emerging Technologies	0%	0%	0%	0%	0%	0%
Other	0%	0%	0%	0%	0%	0%
Natural Gas	0%	0%	0%	0%	0%	11%
Coal & Petroleum	0%	0%	0%	0%	0%	2%
Unspecified Power (92% fossil fuels)	0%	0%	40%	53%	41%	21%
Total	100%	100%	100%	100%	100%	100%
Retail sales covered by retired unbundled RECs	0%	0%	4%	0%	N/A	N/A

- This label does not reflect compliance with the Renewables Portfolio Standard (RPS), which measures the use of tracking instruments called Renewable Energy Credits (RECs) over the course of multi-year compliance periods. RECs that are purchased separately from the renewable energy ("Unbundled RECs") can be used for RPS compliance, but they do not factor into the power mixes or GHG emissions intensities above.
- GHG intensity figures exclude biogenic CO_2 and emissions from geothermal sources and grandfathered imports of firmed-and-shaped energy. For detailed information about all GHG emissions from California's retail electricity suppliers, visit the CEC webpage at the link below.
- Unspecified power is electricity purchased from a genericized pool on the open market. In 2025, 92% of unspecified power came from fossil fuels (natural gas, coal, and petroleum) and 8% came from renewables and zero-carbon resources (RPS-eligible and other renewables, large hydroelectric, and nuclear).
- The unbundled RECs retired in association with SDCP's portfolio were produced by an eligible renewable wind resource. SDCP received these RECs from SDG&E via a state-approved allocation process. The RECs were generated by a legacy renewable energy project built before the state's location-based renewable energy law took effect. For additional information, please reach out via email at info@sdcommunitypower.org.

Powering a Clean Energy Future for Our Community

San Diego Community Power is your community-driven clean energy provider. We are a locally run, not-for-profit public agency serving the San Diego region with lower electricity generation rates as we work toward 100% renewable energy by 2035.

Find Ways to Save

Rebates, Incentives and Offers

Whether you're looking to improve your home, reduce your energy costs or connect your community to resources, Community Power can help you save.
