

San Diego Community Power

As a locally-run not-for-profit, San Diego Community Power (SDCP) is powering a cleaner energy future for today and as a legacy for future generations.

About SDCP

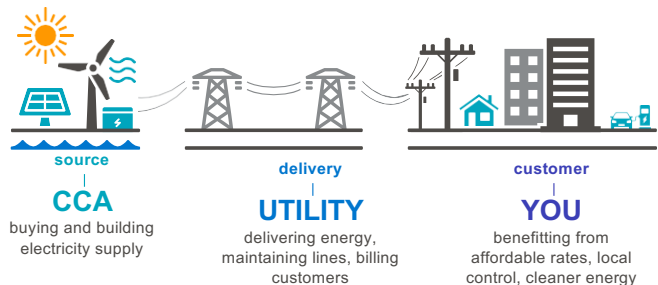

San Diego Community Power (SDCP) is a Community Choice Aggregator (CCA) committed to providing clean, renewable energy choices at competitive rates and investing in innovative programs that benefit residents, businesses, the environment and the economy in our communities.

Who We Serve

SDCP will provide renewable electricity service to approximately 770,000 customers in the cities of **Chula Vista, Encinitas, Imperial Beach, La Mesa, and San Diego.**

HOW IT WORKS

CCAs are locally-run, not-for-profit energy providers that benefit local communities by providing local control of energy choices, focusing on people rather than profits and creating a cost competitive, proven path to 100 percent renewable energy.

POWERFUL REASONS TO CHOOSE SDCP

Customer-Driven Choice— CCAs were created to advocate for ratepayers by providing choice for the first time and shifting control of local energy decisions from profit-driven, investor-owned utilities into the hands of residents and businesses. Competition supports increased transparency, more customer programs, and a better overall customer experience.

Future-Focused— SDCP will offer tiered programs that provide cleaner energy at competitive rates, helping us reach our climate action goals and supporting healthier communities today and for the future.

Proven Path to Saving Money and Our Environment— There are currently 23 successful CCAs operating in 170 communities around California. SDCP will be the second largest in the state by providing the same reliability and affordable electricity service from cleaner, sustainable sources.

Local Management, Investment and Jobs— As a locally-run not-for-profit energy provider, SDCP will never be taxpayer funded and will support economic vitality by providing cleaner energy at competitive rates and funding local renewable energy projects. Clean energy employs more than half a million people in California; that's five times more workers than all fossil fuel industries combined.
