

## We support your power to choose

As part of our mutual commitment to support your energy choice, San Diego Community Power (SDCP) and San Diego Gas & Electric® (SDG&E®) have partnered to provide you with a comparison of typical agricultural electric rates, average monthly charges, and generation portfolio contents.

Please visit [sdge.com/ccs](https://sdge.com/ccs) for the complete SDG&E/SDCP rate comparison or call **800-411-7343**. For information on SDCP's generation rates, please visit [SDCommunityPower.org](https://SDCommunityPower.org) or call **888-382-0169**.

Rates current as of June 1, 2021

## Rates as of June 1, 2021

This compares electricity costs for an average commercial customer in the SDCP/SDG&E service area (Cities of Chula Vista, Encinitas, Imperial Beach, La Mesa, and San Diego) with an average monthly usage of 1,311 kilowatt hours (kWh). This is based on a representative 12-month billing history for all customers on TOU-PA rate schedules for SDG&E and SDCP's published rates as of June 1, 2021.

**Power Source** is the mix of energy resources for generating electricity. This makes up the electric power generation mix that is purchased or generated by your provider and delivered to you. Your electric power may be a mix of renewable energy, natural gas and other sources.

**Generation Rate** is the cost of generating and/or purchasing electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**SDG&E Delivery Rate** is SDG&E's charge to deliver electricity to your business. The electric delivery rate may vary depending on your rate and electricity use, however, it is charged equally to customers regardless of who provides their electric generation.

**SDG&E PCIA & FF** represents the **Power Charge Indifference Adjustment (PCIA)** and **Franchise Fees (FF)**.

- The PCIA is a charge to ensure that both SDG&E customers and those who have left SDG&E service to purchase electricity from other providers pay for the above market costs for electric generation resources that were procured by SDG&E on their behalf. "Above market" refers to expenditures for generation resources that cannot be fully recovered through sales of these resources at current market prices.
- The FF is a surcharge applied to electricity transported over SDG&E systems that are constructed in public streets and highways. SDG&E collects the surcharge from customers and remits them to the appropriate municipality. The surcharge is charged equally to customers regardless of who provides their electric generation.
- The PCIA and the SDG&E commodity portion of the FF are included within the generation rate of SDG&E's standard bundled service.

\*As reported by SDG&E to the California Energy Commission's 2019 Power Source Disclosure Program. SDG&E data as shown excludes retired unbundled renewable energy credits (RECs) of 7.8%, which contribute to SDG&E's reported renewable portfolio standard. SDCP's generation data is a forecast for 2021 and may be subject to change. The figures above may not sum up to 100 percent due to rounding.

\*\*Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
