

Power Content Label reflects 2021 verified electric resources for SDCP.

This information is required by the California Energy Commission to be mailed to active SDCP customers.

The generation data represents energy procured during 2021 and is provided in the "Annual Report to the California Energy Commission: Power Source Disclosure Program."

A portion of SDCP's energy comes from clean, large hydroelectric power stations. Under California law, large hydroelectric power stations do not qualify as eligible renewable resources.

¹ The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology. ² Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source. ³ Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.

SDG&E

Delivers power and maintains the grid

YOU GET

Cleaner power, local control, and competitive rates

Upgrade to Power100

San Diego Community Power proudly offers **Power100** – our optional service level that is **100% clean and 100% carbon-free**.

Power100 consists entirely of renewables like solar and wind power.

*Based on a typical household monthly usage of 500 kWh. Your actual cost will vary depending on your usage.

Enrolling in Power100 means that you're doing all you can to eliminate your carbon footprint from energy consumption.

Upgrade for only \$0.0075 more per kWh – less than \$4 more per month for a typical home*!
