Rates Products Fact Sheet

May 30, 2024

San Diego Community Power is offering two new rate products beginning July 1 in response to diverse customer needs: Power100 Green+ and PowerBase. These products empower customer choice, whether they want to invest in the cleanest, most renewable power available or seek a more economical option to power their homes or businesses.

Power100 Green+

What is it?

The Power100 Green+ product is composed of Green-e Energy Certified electricity, which means that it provides a quality-assured, 100% carbon-free product that meets rigorous environmental, sustainability and marketing claims standards.

Who is it for?

This product offering was created in response to direct requests from commercial and industrial businesses seeking LEED certification or require Green-E certification to meet their corporate social responsibility goals.

Residents and businesses that don't require specific certification can still get 100%, clean, renewable, carbon-free power through Community Power's Power100 product.

PowerBase

What is it?

PowerBase provides a 2.5% discount compared to SDG&E's default service as of July 1 and has a similar amount of renewable energy content.

Who is it for?

Customers who want a more economical option than Community Power's default service offerings, predictability in their electricity generation rates and to continue supporting their community-driven, not-for-profit clean energy provider.

Price-sensitive residents and businesses can take advantage of this opt-in-only service by going to the Community Power website or calling the customer service line to make the switch on or after July 1.

Our Rates at a Glance

NEW

Power100 Green+

PowerOn rate +
\$0.02 per kWh

100% renewable, carbon-free, Green-e certified for businesses looking to meet LEED standards

*Prices valid July 1, 2024 through October 31, 2024.

**Average rate across all SDCP rate schedules.

Why Choose San Diego Community Power?

San Diego Community Power is a community-driven, not-for-profit organization that offers its customers unprecedented choice when it comes to their electricity generation service. The new rate offerings allow customers to retain that power of choice at any time within SDCP service and protects them against the potential swings in the marketplace that they would experience if they were to leave SDCP service and return to SDG&E bundled service.
